HubMax/MiniMax Installation/Programming Manual Addendum

Subject: Prox.Pad Hub Front End Programming Instructions
Date: 2/23/06

The chart below shows the programming commands to program a Prox.Pad to operate as a Hub Front End. These commands are performed on the Prox.Pad keypad, which has it's own programming separate from the Hub DCM. Perform each of these commands in the order shown.

Action	Programming Command
1. Enter Program Mode	99 # master code *
2. Set to Front End Mode	30 # 3 # 1 # **
3. Set to Hub Front End	30 # 15 # 1 # **
4. Exit Program Mode	*

This next chart shows the programming commands for setting the keypad and reader portion of the Prox.Pad unit for In or Out operation. The In and Out operation refers to how an access event is reported in the Hub DCM transaction log. The keypad and card reader can be set separately so you can install the antenna on the opposite side of the door.

Action	Programming Command
Set Reader for In Operation	30 # 16 # 0 # **
Set Reader for Out Operation	30 # 16 # 1 # **
Set Keypad for In Operation	30 # 17 # 0 # **
Set Keypad for Out Operation	30 # 17 # 1 # **
